## PROFILE

Jonathan is a junior full-stack developer offering innovative ideas with fresh enthusiasm, looking to expand his technical breadth in a full-stack role. Has an agile, business-minded approach to solving problems. His adaptability and vast technical skills will suit any working environment.

## PROFESSIONAL EXPERIENCE

### DOUGLASS HANLY MOIR PATHOLOGY

Administration Assistant - Training Department (May 2022 - Sep 2023)

- Continuously updated and maintained cloud database of over 10,000 employees.
- Efficiently created and distributed over 50,000 training and assessment materials, meeting set deadlines.
- Upheld a professional work culture by providing consistent feedback resulting in the improvement and streamlining of training resources.
- Accurately handled and filled sensitive documentation both physical and digital of 1000+ applicants without error whilst maintaining confidentiality.

### JONATHAN OW FREELANCE MEDIA

Media Freelancer - Video and Photography (December 2019 - December 2020)

- Leveraged computer software and technology to ensure high quality deliverables
- Singlehandedly developed and maintained a small business.
- Worked closely with a client base of large not-for-profit organisations such as Sport Disability Australia and The Australian Chinese Association.
- Photographed over 2000 high-quality images for both print and internet distribution.

## PROJECTS

Hotel Reservation System (Python)

- Single handed development of a hotel booking terminal app using Python, utilising imported 3rd party modules to add features and improve functionality
- Implementation of DRY code and separation of concerns.

Portfolio website (HTML & CSS)

- Created a custom made portfolio website using HTML and styled appropriately with CSS
- Thorough design process, using site maps and wire framing software.
